

DIFFERENTIAL DIAGNOSIS OF VECTOR-BORNE DISEASES

**CaniVec-4**

Test detects antigen of *Dirofilaria immitis* and antibodies against *Ehrlichia canis*, *Anaplasma* spp., *Borrelia burgdorferi*.

Sensitivity: Heartworm 99.9%, *E.canis* 98.2%, Lyme 93.0%, *Anaplasma* 96.1%

Specificity: Heartworm 99.9%, *E.canis* 99.9%, Lyme 98.0%, *Anaplasma* 99.3%

Box size: 5

**CaniVec-4 (Leish)**

Test detects antigen of *Dirofilaria immitis* and antibodies against *Ehrlichia canis*, *Anaplasma* spp., *Leishmania infantum*

Sensitivity: Heartworm 99.9%, *E.canis* 98.2%, *Leishmania infantum* 97.2%, *Anaplasma* 96.1%

Specificity: Heartworm 99.9%, *E.canis* 99.9%, *Leishmania infantum* 99.8%, *Anaplasma* 99.3%

Box size: 5/20

**Heartworm Ag**

Test detects antigen of *Dirofilaria immitis*.

Sensitivity: 99.9%

Specificity: 99.9%

Box size: 5

**Leishmania Ab**

Test detects antibodies against *Leishmania infantum*.

Sensitivity: 97.2%

Specificity: 99.8%

Box size: 5/10/20
